EDUCATION

San Jose State University — **January 2026 - *Present***
Computer Science, BS — *San Jose, CA*
GPA: 3.56

West Valley College — **August 2022 - January 2026**
Mathematics, AS-T — *Saratoga, CA*
Liberal Arts: Sci & Math, AA
GPA: 3.59, Dean's List

SKILLS

- **Languages:** C++, C, Python, Java, Javascript, Assembly
- **Technical:** Performance Profiling, Computer Graphics, Circuit Analysis, Linux, Version Control
- **Soft:** Technical Communication, Collaboration, Self-directed Learning, Quality Assurance

EXPERIENCE

Tech Consultant — **June 2021 - *Present***
Target Retail — *Morgan Hill, CA*

- Provided personalized expertise to help guests **select, understand, and purchase** electronics
- Stayed updated on latest tech news and product releases to provide accurate, up-to-date advice and recommendations

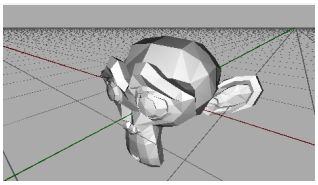
Contract 3D Artist — **October 2025 - January 2026**
Valve Corporation — *Remote*

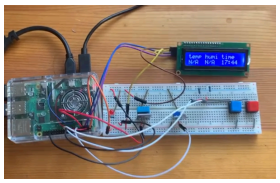
- Authored an officially selected multiplayer map for **Counter-Strike 2** using Valve's proprietary technology, adhering to strict performance and gameplay standards
- Maintained **high-performance** across **diverse** hardware configurations
- Shipped to a global audience of **millions of players** worldwide

PROJECTS

3D Graphics Library (Personal Project) — **November 2025 - Present**

- A 3D graphics library developed from scratch using C++
- Features a flexible shader architecture, model converter for traditional file types, simple animations and flexible scene configuration
- Used as a study into the **performance** and **computational bottlenecks** of 3D graphics for use in future 3D art related projects



Environmental Monitoring Station (Capstone Project, Programming in C) — **April 2024 - May 2024**


- Developed a Raspberry Pi based device which captures, stores, and visualizes environmental metrics (temperature, humidity, luminance)
- Utilized MySQL database for efficient logging and long-term storage
- Allows for **flexibility** in data-visualization, such as graph outputs
