EDUCATION

San Jose State University

Bachelor of Science in Computer Science

San Jose, CA

Jan 2026 – Dec 2027 (expected)

West Valley College

Associate of Science for Transfer in Mathematics

Associate of Arts in Liberal Arts: Math & Science

Saratoga, CA

Aug 2022 – Jan 2026

EXPERIENCE

Contract 3D Artist

Valve Corporation

Oct 2025 – Jan 2026

Remote

- Authored an officially selected multiplayer map for Counter-Strike 2 using Valve's proprietary technology, adhering to strict performance and gameplay standards
- Maintained high-performance across diverse hardware configurations
- Shipped to a global audience of millions of players worldwide

Retail Tech Consultant

Target

Jun 2021 – Present

Morgan Hill, CA

- Provided personalized expertise to help guests select, understand, and purchase electronics
- Offered accurate, up-to-date advice and recommendations to guests

PROJECTS

3D Graphics Library | *C++, Git, Visual Studio, Multi-threading*

Nov 2025 – Present

- Built a real-time 3D rendering engine in C++
- Features a shader architecture, model converter for traditional file types, simple animations, flexible scene configuration, and multi-threading
- Used as a study into the performance and computational bottlenecks of 3D graphics for use in future 3D art related projects

Environmental Monitoring Device | *Standard C, MySQL, I2C*

April 2024 – May 2024

- Developed a Raspberry Pi based device which captures, stores, and visualizes, environmental metrics (temperature, humidity, luminance)
- Utilized MySQL database for efficient logging and long-term storage
- Allows for flexibility in data-visualization, such as graph outputs

TECHNICAL SKILLS

Languages: C/C++, Python, Java, JavaScript, SQL, HTML/CSS, Assembly (ARM)

Operating Systems: Windows, Linux (Ubuntu)

Databases: MySQL

Libraries: OpenCV, rayLib

Tools: Git, VS Code, Visual Studio
